# TWO HEAVY HITTERS TOUCH BASES ON BATS, BALLS, AND BEER.

**BOOG POWELL** (Former American Baseball Great): Koichi here has been giving me a new angle on baseball. It seems the game's a little different in Japan.

**KOICHI NUMAZAWA (Former** Japanese Baseball Great): そう、例えばフィールドが小さめ ですね。

**BOOG:** That's right. The field is

smaller over there.

KOICHI: つまり、ショートで小さめ な日本人の体格に合わせたんですよ。 BOOG: Well, now that you mentioned it, I guess you guys are kinda smaller. Does that mean you drink Lite Beer 'cause it's less filling?

KOICHI: いやー, おいしいから飲む んですよ。

BOOG: Tastes great? That's why I drink it, too! I guess we have a lot more in common than I thought.

KOICHI: その通り!どうです, 日本 の野球チームに入りませんか。 BOOG: Me? I'm too big to play on a Japanese team.

KOICHI: そんなことないですよ,シ

ョートに最適ですよ。

BOOG: Shortstop?! Very funny.

# History of the Expo 10,000

By THOMAS O'TOOLE

The seed was first planted in 1973. The roots began to take a firm grasp in 1977. By 1978, the first blossom appeared. And now, as the fifth Expo 10,000 prepares to explode down Gay Street, the flower couldn't be prettier.

With the field swelling each year and community interest keeping pace, this ambitious project has built for itself a special place in Knoxville. The event is a tribute to those who gave life to the idea.

This year, almost 5,000 runners are expected to enter. It seems like only yesterday a "mere" 1576 were crossing the finish line.

Tom Siler, now-retired sports editor of The Knoxville News-Sentinel, Mike Crawford, past president of the Knoxville Track Club, and Frank (Porky) Callaway, Jr., vice president of the Athletic House, were there at the beginning.

"Without hesitation, I can say Tom Siler first brought up the idea," Crawford recalled. "He had always thought Knoxville should have a race of some distance. He didn't really decide the distance, but he said it should encompass the entire city and be run in downtown to bring focus and attention to the town and running in general."

KTC had been running small races throughout East Tennessee. But they weren't providing a point of focus, a showcase for the club. In early 1977, Charlie Durham of the KTC told Crawford the Athletic House had expressed interest in promoting a road race. Durham put Crawford in touch with Callaway. The two had lunch, and from that

the Expo 10,000 was born.

"When you get Athletic House involved, you had the locations and long-standing tradition of business involvement—something substantial," said Crawford, still on the KTC board of directors and coordinator of the finish area.

"We also had a chance to get a national sponsor, like Adidas. I knew they sponsored a race in Tampa. I thought, why not? We could do it here."

Crawford, Callaway and Siler, also on the KTC board, began meeting regularly, their optimism growing each time. Soon it became simply a matter of finding out how much the Athletic House and Adidas would become involved.

"I have nothing but praise for the Athletic House," said Crawford. "We have had total involvement. It has been a great marriage."

At the time plans were being formed, the 1982 World's Fair was becoming a reality. It's first name was "Expo '82," hence the "Expo 10,000."

The trio then took the idea to the KTC, where it was readily accepted. Other people became involved, including race coordinator Col. Joe Shepherd, present KTC president John Watson, Hugh Wilson of Adidas, Pat Kouns, Dr. Tom Prince, Bob Killefer and Hal Canfield.

The only hold up was discussion over where the race was headed. The KTC wanted a race that would be lasting. They felt with the combination of three long-standing Knoxville organizations — The News-Sentinel, the Athletic House

and the KTC — the future of the race would be secure.

They also decided to avoid going national, to keep the focus on a local level. They are not committed to bringing in "name" athletes. That costs money, and all the money that is earned from the event (\$14,300 last year) goes back into the KTC and then into promoting running in the East Tennessee area.

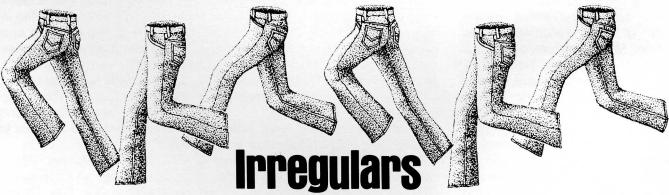

"We get a lot of thank you letters," said Watson. "And the ranks of the KTC swell after each race. I get some inner satisfaction. If I didn't I wouldn't do it. But I also get the satisfaction of being involved in one of the greatest sporting events the state of Tennessee has ever had."

The growth rate has been more than encouraging. The first year saw 1576 finishers. The second had 2190, the third 2278 and last year's 2439.

Ed leddy, a former East Tennessee State all-American from Ireland, won the first three with times of 28:35, 28:30 and 30:21, respectively. Last year, Bryan Kilpatrick won in 31:30, although former UT runner Sal Vega — not officially entered — crossed the finish line first.

"To me the key to the race was putting the right parties together," said Crawford. "We had had people come to us wanting to put on a race in the past, but my concern was would they want to do it the next year? After we got the right parties, there was no doubt in my mind it would work."

# At our prices you'll never have to run out of the Jeans that keep America running!

# The Expo Cast...

There they are in the photographs, the crowds surging across the Gay Street Bridge, thousands of runners of widely-varying interests and athletic abilities. What brings them together on this one day? How did they get to this point?

For each person on that bridge there's a story...of how he started running that first mile...why she entered a race. Come along on a random visit with area runners and a glimpse into their experiences with running.

At age 64, Max Springer had never run before, let alone run a 10K race. On the agriculture faculty at UT, his soil surveys had him walking virtually all day for the past 15 years. But now he was beginning to huff and puff a bit on his daily rounds. Max decided the time had come to do something. He enrolled in the physical fitness program at UT and began running in January, 1978.

Five months later, Max entered the first Expo 10,000 and he's been running ever since. In the intervening years he had picked up a trophy as the oldest runner in Expo and has whittled his 10K time down to a personal best of 49:56.

Max is still participating in the UT fitness program, in addition to a regular running schedule. He runs every other day throughout the year ("except for ice storms and a few days around Christmas"), covering between 2½ and 4 miles, with an occasional five-miler.

Why is he running Expo this year? "The day-to-day running is to stay in shape and condition. Running Expo is just for the fun of it, just to say we've done it, just being there with all the other 'darn fools'. Just completing 10,000 meters is a real feeling of satisfaction."

While Max calls Expo "the" race for him, he has run in other local races. And those who ran behind him in Gatlinburg's hilly 10K just can't believe Max Springer only began running at 64!

For some, the army is a time to firm up, trim down, and get in shape. For Bob Godwin, with a desk job, it was not the case. After his "sedentary" service, he found that his old civilian clothes no longer fit, and he set out to do something about it. He read Kenneth Cooper's Aerobics and picked out running as an approach that might work for him. He worked to complete that first mile ("being able to run a mile I thought put me in an elite category") and gradually built up to three. That was in 1968.

Fourteen years later, Bob is a veteran of three Boston marathons and, with a personal record of 34:22 in the 10K, is among the area's topnotch runners.

Why does he run today? He chuckles and paraphrases a familiar line: "If you have to ask, you wouldn't understand." Then he turns serious.

"Because it's satisfying. I get to see every flower. I'm in tune with what nature does." As for racing, "you explore your limits and reaffirm yourself. It's rewarding to face some kind of hurdle, to persevere, and to surmount it. In a race, limits that I thought I had don't exist."

One marathon in particular stands out as especially rewarding. Bob was not physically well at the time of one Boston Marathon. His finishing time (3:04) was not his best, but his effort was. "That was my most satisfying race. I gave the most I could give. It represented everything I could do under the circumstances. Giving 100%, that's satisfaction."

The army was an impetus, in a sense, for Tam Hoskins' running, too — though she was never part of the ranks. Her husband, John, was stationed at Ft. Benning, Georgia, where all the troops were required to complete a 5-mile race. All comers on the base were welcome, though, so Tam and friends who had been running together decided to enter. Early on July 4, 1977, Tam ran her first race and was the third woman to cross the finish line.

Who would have envisioned Vanderbilt's one-time homecoming queen and cheerleader running alongside chanting, army-booted recruits?

Tam is still running and has begun to run "a little more seriously these past two years". Her Expo times reflect it. She has knocked "8 or 9 minutes" off her time and finished last year in 50 minutes.

"Preparing for Expo last year was fun," Tam says. "Several friends and I entered every local race we could find; I amassed a stack of tee shirts!"

For Tam, the day-to-day benefits keep her running. "It's my quiet time. I just plain enjoy it."

Kenton Page was known to some as the courteous man behind the counter at Page Apothecary, to others as an active participant on the Fountain City United Methodist basketball team. But it's unlikely that anyone would have thought of the former 200-pound, 5-foot-8 high school linebacker as a runner.

But late in 1974, the church basketball team realized that the opposing teams were getting younger and younger. (Or was Fountain City Methodist getting older?) Remedial action was called for; the team decided to get in shape and start running. "It was torture to think about running more than a mile," Ken recalls.

Eight years later, Kenton Page has completed three marathons and has run the 15K in 63 minutes. He ranks in the top 10 percent of the Expo runners.

Why does he run in races? "I enjoy the competition. Running is like golf: you compete against yourself and the course. As long as I feel I've done as well as I can do, I'm happy."

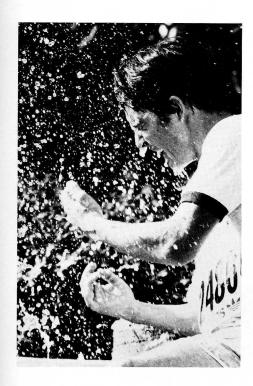

As a blonde, effervescent, partygoing college girl, Julia Huster would never have considered running. She did take up some tennis in her twenties, but, as she says, "Who would have thought I could have done anything athletic?"

About the time she turned 30, Julia was aware she was getting flabby. "I thought, 'Is this what I have to look forward to?" "She quit smoking and started running.

Today, Julia runs the first mile of Expo "between 7 and 7:15". Her finishing time last year was "somewhere around 48 minutes."

She laughs to recall her incentive. "My husband, Edwin, and I had made a side bet to see if I could

# See Why They Run.

break 50 minutes." This year they may lower the wager to 47 minutes.

Although it's a pleasant surprise to Julia to see her running times improve so rapidly, that's really not her reason for running. "It's the peace of mind...being able to get outside and think...the satisfaction of knowing I can meet the challenge."

Jim Hart had been a sprinter on the high school track team, but at age 25, running was a thing of the past. On moving back to Knoxville, he had a startling revelation. He and his father, John Hart, then age 59, went out for a run. "I couldn't finish a mile," says Jim, "and my father could run circles around me."

Jim promptly signed on at the downtown Y in a physical fitness program and began running 3 days a week.

In 1977, he entered his first race. He and a group of friends ran the Winston-Salem 10,000 "just to see if we could finish." He was hooked. "I was caught up in the contagious atmosphere of the race. The spirit of community participation was exhilarating."

(John Hart, incidentally, ran his first 10K a year later—the first Expo race.)

Since then, Jim has continued to run, averaging 6 to 10 races a year. He's broken 40 minutes in the 10K several times, and smiles at the speculation that—at age 39—he "might run his age this year."

Jim plans to build up his 35-milea-week average to 40 to 45 miles for Expo. This shouldn't be too difficult for him: Jim Hart hasn't missed a day running since November 28, 1978!

Judy Fardon's eyes sparkle when she talks about running and her family's participation in Expo. "My family runs Expo every year. The rest of the year we celebrate wellness and fitness individually, but Expo is a coming together."

(So is her birthday in the spring, when the family all gets up and runs three miles with her.)

Judy was 37 when she ran her first mile and breaking a 12-minute mile was a real triumph. Although her family has some talented runners (husband, David, and sons, Alex, Josh, and Zack, have 10K times ranging from 36 to 45 minutes), they enthusiastically applaud her efforts to finish in 60 minutes.

Speed, for Judy, is a negligible factor in running. "It's the joy of movement, the comaraderie of friends."

There have been a number of inspirations for her: Lunch with actress Mary Martin (when she was performing one year at the Clarence Brown Theater) impressed Judy with the vitality and zest for life in someone older who stays physically active. Her local inspirations are "Mrs. Baker and Mrs. Howard, two ageless women who walk a brisk three miles on Cherokee Boulevard. They radiate a love of life that comes from being active."

While she may not realize it, Judy is an inspiration herself. For the past two years, she has run Expo with a number of friends' children in tow. She has encouraged and comforted these young runners—and has even attended scraped knees mid-way through the race.

For Judy Fardon—and for those around her—Expo is truly a cele-

bration.

These are just a handful of the supporting cast of thousands that makes up Expo. There are so many more.

Jack Davis runs Expo with his daughter, Lea, "just to be with the people, watch the sights, be a part of the fun."

Harry Ogden acknowledges "I'll never be another Salazar," and runs "just for maintenance and fun. If I do better than last year, fine. If not, I'll still be running."

Bill Muse takes a break from tennis just to gear up for Expo. It's Bill's only race of the year, but he runs it because "it's an event."

Seventeen-year-old Lisa Klaasen is bubbling with enthusiasm as she prepares to run Expo for the first time. She and a friend, Beth Gorham, will be training and running together. "We're going to have a picture made at the finish line."

So many people, so many stories make up that crowd. Their reasons for being there are as varied as their innate athletic abilities. But each is an affirmation of the joy of running.

Mary Kay Sullivan

Mary Kay Sullivan regularly runs Expo and contributes an article to the program.

doc's gym and fitness center...the only place to go when you're busy but serious about getting in shape. Don't expect any hype or sales pitch. When you make up your mind to shape up, trim down, build your strength, increase your flexibility, and feel better, doc's is ready for you. doc's skilled counselors work with you to establish your personal goals and develop a total fitness program to fit vour schedule. And

your progress is closely supervised. The center of attention is you. Because doc's is not a social club or spa you don't pay for useless frills. Your annual membership fee is all you pay. No extra monthly charges. And you use the facilities all you like. doc's gym and fitness center. No-frills fitness. Created for the busy business executive, homemaker.

# **Training & Racing**

### A Six Week Guide for Novice and Intermediate Runners

Assuming that the runner has developed a mileage base of some 12-20 miles per week over the past several weeks, he or she is now ready to sharpen for a race which is 6-8 weeks hence.

The program suggested here utilizes the "hard-easy" theory espoused now by many coaches and runners. The idea is to work hard one day and rest or work lightly the next. This will give your body a day to recuperate from the previous day's stress and to recover sufficiently to prepare for the next day's workout. Many people have found that this approach reduces the risk of injury as well as increasing training effects.

In addition to the "hard-easy" approach, this program also incorporates a 4-dimensional training menu which includes:

1) Distance

3) Hills

2) Speed

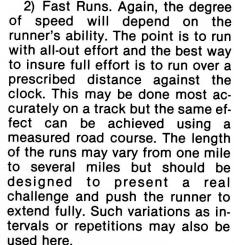

4) Rest

These elements constitute a well-balanced running program and will help the runner develop both strength and endurance. In addition, the variety written into the training program will help reduce "staleness" or mental fatigue and

keep the runner's interest in training.

The 4 dimensions described below may be altered to fit the individual runner's needs. While a "long" run for some may be 3 miles for another it may be 10 miles. Hill workouts may be repetitions of a ½ mile hill or 5 repetitions of a ½ mile hill while "fast" for one person may be a 10 minute mile and for another a 6 minute mile.

1) Long Runs. Depending on the runner's ability, level of conditioning, and the length of the race for which he or she is training, these will be runs of from 3 to 30 miles. For a novice or intermediate runner training for a 10-K race, "long" will probably mean somewhere between 4 and 8 miles. On a long run, the runner should run at an easy steady pace for a prescribed distance. Long runs may also be measured in terms of expired time. That is the runner may run 40 minutes or 60 minutes without regard to the distance covered. (An experienced runner can measure very accurately the distance covered by knowing the elapsed time and estimating his or her

3) Hill Workouts. Find a steep hill which is 1/4 to 1/2 mile long. At first, simply running to the top without stopping may constitute a good workout. Eventually, the runner should be able to run to the top, jog down, turn immediately and run to the top, jog down, and repeat several times. On a 1/2 mile hill, a 2 mile workout will consist of 2 runs up and back. Hill workouts help the runner develop strength as well as endurance and even if the race is on a flat course, hill work will be of value to the runner in having strength over the last mile or two.

4) Rest. Rest may take the form of a day completely off-no running or workouts whatever. Or, it may be in the form of a very easy jog to loosen up and relax muscles and provide a psychological lift of an "easy" day. Or, it might mean a long walk instead of a run. Some runners use rest days for weight training sessions, swimming, bicycling, or alternate forms of exercise. If a person feels tired, it would be well to use a rest day for complete rest while if he or she feels in the mood to run or to get out into the world, it might be a good opportunity for a nice leisurely jog or a jog-walk or simply a walk.

The six-week training schedule listed below incorporates both the "hard-easy" theory and the 4-dimensional training approach described above. This schedule may be modified as necessary to make it fit the individual runner's training level. In general, the program as written should be appropriate for a novice-intermediate runner with some degree of previously acquired training base. It is **NOT** appropriate for someone just now beginning to run.

DAY	WK. (1)	WK. (2)	WK. (3)	WK. (4)	WK. (5)	WK. (6)
SUNDAY	2 fast	2 jog	6	2 jog	1 jog	1 jog
MONDAY	2 jog	2 fast	1 jog	3 fast	2 jog	2 hills
TUESDAY	4	1 jog	2 fast	1 jog	3 fast	1 jog
WEDNESDAY	1 jog	4	2 jog	2 hills	1 jog	2 fast
THURSDAY	2 hills	2 jog	2 hills	2 jog	2 hills	1 jog
FRIDAY	0	2 hills	0	0	0	0
SATURDAY	4	0	4	6	6	race

Anyone who follows the above schedule for six weeks is prepared to run a 10-K race comfortably. The runner should be able to run all the way and do so with relative ease and no threat of injury or illness.

The only danger to the runner as race-day approaches is that he or she will "panic" either in the days just before or on the day of the race and do something foolish such as overtraining or going out too fast. People have been known to decide three or four days prior to a race that they are not in good enough shape and to try to make up for lost time by running two or three hard workouts a day for the days remaining before the race. On race day, they are exhausted (and often injured). It is important to reduce training rather than increase it in the days prior to the race. You need rest, not work. Physiologically, it is impossible to improve your fitness in the days immediately prior to the race but it is possible to destroy your training effort through fatigue or injury.

Another danger is succumbing to the excitement of the race and running too fast for the first mile or two. First-time competitors are

especially vulnerable to this and a 10-minute miler may find that the adrenaline and the excitement of competition have produced a 7:30 first mile. The inexperienced runner will be exhilerated and will continue the pace, having visions of breaking 45:00. It is likely that we will find them walking on the side of the road at about mile 4 and the next 2 miles will be nothing but agony.

Some simple race day hints include the following:

1) Don't worry if you didn't sleep well. For a Saturday race, it is not Friday night's sleep that counts but rather Thursday night's and Wednesday night's.

2) Don't eat a big breakfast. Many runners do better with no breakfast at all. If you have to eat something, make it simple and light. (2 pieces of toast or a couple of biscuits). Easy on the coffee and juice but drink a little extra water.

3) Wear too few clothes rather than too many. If there is any question about whether you need sweat pants or a jacket, you don't. It is better to be too cold than too hot.

The day will get warmer quickly if there is any sun at all and runners heat up within a very few minutes even at a slow pace. A few shivers at the start are well worth the price of a soggy sweatsuit for six slogging miles.

4) **DON'T, DON'T,** go out too fast. Don't race with anyone, don't push to keep up with anyone, don't try to run against the clock for at least three or four miles. There will be plenty of time to pass people and to race in the last two miles. If you race at the start you may be walking at the finish. If you run easily and well in-control at the start, you should finish fast and strong.

In summary, if you train consistently and are well-prepared in the weeks prior to the race you should approach race-day with confidence. If you stay relaxed and run comfortably you will finish with no problem and should be able to run strongly at the finish.

Vicki Johnson

Vicki Johnson is a veteran of three Boston Marathons and numerous other distance races.

### **RUNNING MOTHERS**

Sue Stricklin, 43, winner of the Master's division of the 1981 Boston Marathon is the mother of 4, grandmother to 3.

Karen Duppes Cosgrove, 2:45 marathoner, ran (60-80) miles a week until the ninth month of her pregnancy. Following an extremely easy delivery of a 7½ pound boy, she resumed training for the 1984 Olympics.

An unidentified mother of six ran four miles a day until the day before delivering her seventh child. Still another unidentified mother-to-be ran **every** day, including the day she stopped at the nearest hospital in the middle of a run to give birth to her third child.

Linda Schreiber started running as a means of taking a "time out" from caring for a four year old daughter and infant QUADRUP-LETS. Five years later she placed 11th in a field of 1100 women at the New York Marathon (2:54:33). She has since written Marathon Mom, The Wife and Mother Running Book. (Houghton Mifflin Co., Boston, 1980).

Mothers of infants who do not have sitters have been known to get in their daily mileage by running laps around the outside of the house while baby sleeps inside. Other mothers run up and down the driveway while baby sleeps.

In some neighborhoods, running mothers have formed cooperatives in which one mother babysits for a group of toddlers while their mothers run. The next day a different mother sits while the others run

Ruth Anderson, 52, began running ten years ago so that she would feel free to "party and eat afterwards." She has since set world-age records for the marathon and for 100 miles on a track. She has also set masters records for the Pikes Peak Marathon and the National 50-Mile Championships. She trains eight miles a day seven days a week and runs 60 races a year. Her 15 year old daughter is a cross-country runner.

# Adidas, Superstar

### A German speed merchant makes a runaway success outfitting the sports world

by Roger M. Williams

By Courtesy of "Signature"
The Diners Club Mag
Copyright 1979

Everybody with two feet knows what has happened to sneakers. They've become striped, colored, scientifically designed and damned expensive: A good pair of "Running shoes"-the term sneaker is passe-now can cost over \$40. What's more, sneakers have become fashion items. (And logically enough: A \$40 shoe should be good for something besides playing games.) The sidewalks of American cities are increasingly being trod by Adidas, Pumas, Nikes and a welter of other brands. In New York City and a few other places, they are showing up at cocktail parties and even at more formal occasions.

If you consider this yet another triumph of American marketing skill, you're wrong. The folks who sell the world American soft drinks. toothpaste and razor blades were passed on the first turn in the sports shoe derby. That is, they were left to pitch Keds and other artifacts from the Stone Age of sneakers, or, like Nike, to plunge late into the business and play catch-up. The company they've been catching up to, especially in design and marketing ideas, is West Germany's Adidas. The name may just possibly be unfamiliar, but not its omnipresent trademarks: three parallel stripes and three leaves in the shape of an artichoke.

"Adidas led the way," says Elmer Blasco of the National Sporting Goods Association. "They made an athletic shoe that was recognizable, with those stripes on the side." And look, Blasco adds, where that has led: "A shop used to offer four shoes—white and black, high top and low. Now you need one shoe to run uphill and another to run back down again."

A truly global sporting goods company, Adidas (the Germans accent the first, rather than the middle, syllable) distributes its pro-

ducts in some 150 countries. Shoes remain its staple. The current U.S. catalog lists 226 adult and children's models for sports that range from soccer to windsurfing and that include such all-American pastimes as baseball and football. The catalog also displays a dozen models of "leisure" shoes, for those dressier occasions when tennis or jogging gear won't quite do.

But Adidas does not stop with shoes. It makes rackets, balls, tote bags and that other essential of fashionable exercising, warm-up suits. In the suburbs of America. the warm-up suit has become to the supermarket trip what the jogging shoe is to the casual party-a means of telling the world that the wearer is both athletic and au courant. Half a world and many cultures away, similar trends are evident. In the back-country of Zaire last summer, Western witnesses to a German rocket test were surprised by the attire of the black work crew: All wore Adidas T-shirts, and several carried Adidas bags.

Although Adidas and its major competitors do not release sales figures and other financial data, it is safe to say that, at present, Adidas is the world's most successful sporting goods manufacturer. In the huge American market —20 million pairs of tennis and jogging shoes sold in 1977—the company does not lead in terms of total units. But, according to its general

manager for the U.S., "we're considered number one in running and training, in tennis and in pro football."

It is relentless promotion that best characterizes Adidas' approach to merchandising. For at least two decades, Adidas has shod an outsized proportion of Olympic track and field athletes (83 percent in 1976). This has been coupled, over the past few Olympic Games, with international TV coverage; athletes on camera have been known to point to their threestriped shoes and even to wave them at that world full of potential customers—all to the professed horror of Adidas' officials, of course.

Adidas also trumpets its connections with slightly less earthshaking events, such as world heavyweight title fights. And it leans heavily on individual endorsements involving big names: the New York Cosmos' Franz Beckenbauer and several European stars for soccer shoes; Kareem Abdul-Jabbar for basketball shoes; Ilie Nastase, Billy Jean King, et al. for a wide range of tennis equipment.

The "development" projects that Adidas pursues with leading practitioners of various sports involve part promotion and part legitimate research. Recent examples include Charlie Brumfield and Marty Hogan, stars of America's fastgrowing sport of racquetball, and racing driver Mario Andretti. The racer advised Adidas on production of a shoe called the Monza, which is fireproof and has a non-slip sole, attributes that prompt the Adidas people to claim—of auto racing, no less-that "it's the shoe you wear that's all important." The market for such a shoe might seem limited, but given Adidas' talent for huckstering, it is not difficult to imagine Dad taking advantage of the Monza's accelerator grip to gun his

Camaro into a 90-degree turn at the shopping center.

From a management standpoint, Adidas is a tightly controlled family operation that holds the pressand outsiders in general-at arm's length. Its spokesmen proclaim, ad nauseam, the superior quality of the company's products and the saintliness of its late founder, Adolf (Adi) Dassler, while turning away routine questions that they consider indecently probing. Adi Dassler (he telescoped his name into "Adidas") died last September at the age of 77. He spent his life watching and talking with athletes and analyzing the problems and possibilities of the equipment they use. First from Europe, then from everywhere, athletes and their coaches came to the little town of Herzogenaurach, near Nuremberg, to consult with Dassler's designers and technicians.

Among the results have been a long series of improvements in sporting goods, improvements that benefit not only the world-class performer but the weekend amateur as well. Dassler himself held several hundred patents. His innovations included the first shoes with screwin, interchangeable spikes and cleats, and the first shoes orthopedically designed and specially padded to protect such vulnerable points as the Achilles tendon.

All of Adidas' triumphs, of the feet and the balance sheet, have been achieved in an odd business setting. Herzogenaurach is far removed from the great sporting goods markets and citadels of pro-

motion, yet Dassler and his descendants have made every policy decision right at home. Both the advertising themes for the U.S. and the pitch to be used with the coach of Russia's track team are decided at headquarters on the banks of the spindly Aurach river. Even odder is the local competitive situation: Just across the river, on Herzogenaurach's main street, sit the offices of Puma, which, in sporting goods, has traditionally played Avis to Adidas' Hertz.

Until his death in 1974, Adi Dassler's elder brother, Rudolf (Rudi) ran Puma, and the struggle between them has assumed almost mythical proportions. Their father started a slipper factory which the sons, in the Twenties, converted to sports shoes. Soccer and running shoes were the Dassler Company mainstays. Its single greatest achievement came on the flying feet of American sprinter Jesse Owens, who wore two pairs of Dasslers while winning four gold medals at the 1936 Olympic Games.

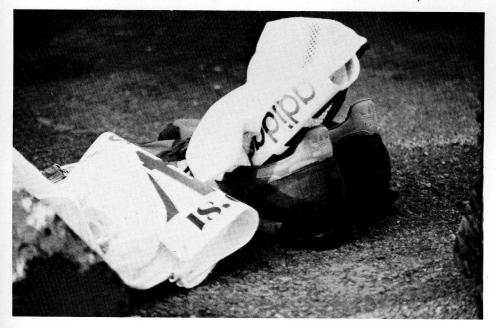

In 1948 the Dasslers parted amid great bitterness. Adi kept the shoe factory and a few dozen workers and renamed the enterprise Adidas. Rudi turned a house into a second factory, persuaded 15 of their former workers to join him, and slapped the name Puma on the sports shoes that came off the assembly line; before long he had his own trademark and symbol—a single, streamlined stripe on the sides of his shoes. Rudi himself, tall and silver haired, became

known as "Old Puma."

Precisely why the Dasslers split remains a secret that, according to people in Herzogenaurach, is known only to the dead brothers and their tight-lipped families. Officials at both companies insist that the reasons were personal, not commercial. Whatever that means, the results were indisputably startling. For 16 years, from the split until Rudi's death, the brothers never spoke to each other. As far as is known, they never saw each other -a remarkable feat in a town of 15.000. Rudi's funeral was attended by a few members of Adi's side of the family, but not by Adi himself, and none of Rudi's descendants were even invited to Adi's funeral.

Some local historians rank the break between the Dasslers with a 17th-century visit by marauding Swedes as the major events in the town's 1,000-year lifespan. According to slightly lascivious legend, Herzogenaurach was originally a meeting place for monks and women. It is dominated today by a pair of towers that formed the strong points in a wall that encircled the first settlement. Narrow, cobbled streets twist away in various directions, and at rush hours, the main road echoes to the buzz of motorbikes and the rumble of diesel trucks. The town's principal sporting goods shop plays it safe, giving equal billing to Adidas and Puma. And on the streets, the brands seem to get about equal wear, with the choice, one suspects, often made according to where a relative works.

The dining room of a local hotel hums with assorted languages, as Adidas executives entertain clients from afar. Sellers as well as buyers appear. The week I was there, a representative of a Texas firm called American Pneumatics was attempting to interest Adidas in an air-inflated running shoe. The Texan termed the shoe, which can be inflated to suit the weight of the wearer, "so far ahead of anything in footwear that it's like comparing a 707 with a DC-3." Adidas was cautious. "The air shoe could be the future," a company official told me, "but it seems that when you step down on the heel, the air will all go to the toe. Then what happens?"

The gates of The 1982 World's Fair in Knoxville, Tennessee, are open! Opening Day was May 1, and until October 31, 1982, the World's Fair will host over 20 international and 50 corporate participants, with pavilions and exhibits showcasing, in every form imaginable, the Fair's theme, "Energy Turns The World."

The site comes alive daily at 10 a.m. with marching bands, mimes. musicians, spectacular shows in the Tennessee State Amphitheatre, laser shows in the Federal Express Pavilion, bluegrass bands and string quartets, and a world of fascinating pavilions and exhibits depicting advanced energy technologies and international cultures. Even though the site closes at 10 p.m., the fun is not over. The Family FunFair amusement area and several dining facilities are open until after midnight, adding to Knoxville's nightlife.

For its 184 days, The 1982 World's Fair is the place to be...don't miss it.

### Theme:

The theme of The 1982 World's Fair is "Energy Turns The World," chosen because of the worldwide attention now focused on the problem of energy consumption and supply, and because Knoxville, Tennessee, has become a world energy center. Tennessee Valley Authority, the nation's largest power system; and The University of Tennessee, with extensive energy-related research programs, are located in Knoxville. Within an hour's drive is world-famous Oak Ridge National Laboratory.

The World's Fair theme is allencompassing. It is depicted in the corporate exhibits as they show new energy technologies and ideas for the future; in international pavilions as countries show how they are coping with the world energy problem through energy research and advancements taking place in their nations; and even in the energy of the human mind and body—the creative energy embodies in such performers as Rudolf Nureyev, Carlos Montoya, Hal Holbrook, Bill Cosby and Bob Hope. The World's Fair represents all aspects of energy, offering fun and entertainment for visitors of all ages.

### Location:

Knoxville is the third largest city in Tennessee and the 75th largest city in the nation. Population in the Knoxville area totals more than 300,000. Long known as the gateway to the Great Smoky Mountains, the most visited national park in the United States, Knoxville is located within 600 miles of onethird of the nation's population. Three major interstates converge on the area: I-40 from the Atlantic Coast to the Pacific Coast, I-81 from northern New York, and I-75 from the Midwest to Florida. Over \$220 million in highway improvements have made the city easily accessible.

The rolling foothills of the Smokies, a temperate climate, abundant plant and animal life, traditional Appalachian crafts, and a variety of family recreational activities combine to make Knoxville

and The 1982 World's Fair a very popular vacation destination.

### **Corporate Participation:**

Over 50 corporations and organizations are participating in The 1982 World's Fair with official designations, sponsorships, and dramatic pavilions and exhibits. Highlights of corporate participation include the Federal Express Pavilion featuring the largest laser light show ever; The Sun Company's (Sunoco) exhibit of the sun's role in energy development; the Strohaus, an authentically styled Bavarian beer garden sponsored by The Stroh Brewery Co.; and the 11,000-square-foot Occidental-Tenneco Pavilion that will showcase the 21st-century technology the two companies are developing to extract oil from shale. Other corporate exhibitors and participants include Ford Motor Company, Du Pont, Gas Exhibits, Inc., Tennessee Valley Authority, Stokely-Van Camp, U.S. Steel, Texaco, General Electric, Union Carbide, Coca-Cola, Eastman Kodak, Anheuser-Busch and Delta Air Lines.

### International Participation:

In terms of international exhibit space, The 1982 World's Fair is the largest sanctioned World's Fair to be held in the United States in over 40 years. The governments of over 20 nations are sponsoring pavilions that showcase the history, art, culture and energy technology of their nations. The People's Republic of China is taking part in the exposition, marking that country's first participation in a World's Fair since 1904 and the first ever for the present regime. Their exhibit features stones from the Great Wall of China, terra-cotta warriors and horses unearthed eight years ago

from the burial grounds of Chinese Emperor Ying Zheng, and a variety of art treasures.

Other international participants include Italy, Japan, France, Australia, Canada, the Federal Republic of Germany, the Hungarian People's Republic, the Republic of Korea, Mexico, the Philippines, Saudi Arabia, the United Kingdom, and the European Community.

### The Site:

The 1982 World's Fair occupies 72 acres between downtown Knox-ville and The University of Tennessee and borders the Tennessee River on the south side. International and corporate pavilions, theaters, renovated buildings, sculpture courts and beautiful land-scaping have transformed that blighted area into a marvelous, mile-long arena for the arts, sciences and a world of entertainment.

### **Accommodations:**

The 1982 World's Fair Housing Bureau has listings of hotel, motel and supplemental lodging accommodations. For information on housing and assistance with making reservations, call (615) 971-1000.

### Admission:

The 1982 World's Fair offers one-day and two-day admission tickets. One-day tickets are \$9.95 for adults, \$9.25 for adults over 55, and \$8.25 for children ages 4-11. Children under four are admitted free. A two-day admission ticket is \$15.95 for everyone. Special Season Passes are \$100 for adults and \$50 for children. These ticket prices are lower than those of other family-oriented attractions such as Opryland, Six Flags, King's Island and Busch Gardens and allow visitors access to all exhibits and

on-site entertainment. Rides in the Family FunFair amusement area are ticketed separately. A universal coupon system is used for admission to the rides and coupon books of different quantities and values are sold at World's Fair admission booths and at ticket booths in the amusement area. World's Fair tickets can be purchased in advance or at any of the Fair's four entry gates.

### Entertainment and Special Attractions:

The World Festival of entertainment at The 1982 World's Fair is non-stop. From the opening morning parade to the nightly fireworks display, the site offers the shows. the music, the performers and the productions to please all ages. Jugglers, mimes and magicians entertain everywhere on-site, six biggerthan-life cartoon characters delight youngsters: bluegrass, countrywestern and rock bands perform in the intimate, open-air Elm Tree Theatre; Opryland U.S.A. produces the musical celebration of Tennessee staged in the Tennessee State Amphitheatre. Mary Travers (of Peter, Paul and Mary), Jimmie "J.J." Walker, Chet Atkins, John Hartford and the Ink Spots are but a few of the artists making appearances on site.

A separate, 1.4-acre section of the site salutes the heritage, crafts, cuisine, entertainment and culture of the South and South Central Appalachia. This Folklife Festival features 38 different performers, artists, craftspeople and musicians every week in a tribute to Appalachian living.

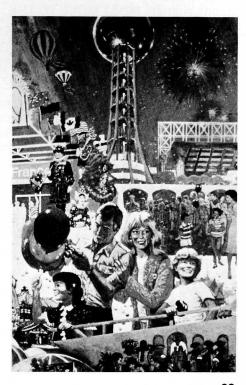

With entertainment extravaganzas being held off the Fair site at various venues throughout the city, the World Festival embraces all of Knoxville. Superstars, dance troupes, international symphony orchestras and special productions are included in the off-site events. Rudolf Nureyev, Johnny Cash, Bob Hope and Bill Cosby are among the headliners appearing in conjunction with the World's Fair. Jennifer Muller and The Works, the Dance Theatre of Harlem and Les Ballet Jazz de Montreal are some of the dance companies that are making appearances. International symphony orchestras include the London Symphony, the Warsaw Philharmonic and the Scottish National Orchestra. Visitors and Knoxvillians alike will enjoy the very special productions of the Grand Kabuki Theatre of Japan and "Ain't Misbehavin'," the Tony awardwinning Broadway musical. Sports fans will want to see such events as the Avon Women's 10K Road Race, The Athletic Congress Championships, International Baseball, ABA-USA Basketball, and the World's Fair NFL Professional Football Game between the Pittsburgh Steelers and New England Patriots.

More thrills await fairgoers at the Family FunFair amusement area. Thirteen "adventures," including the 162-foot-high Ferris wheel (one of the world's largest) and the never-before-seen Ranger (which offers a breathtaking swing through space), are highlights. State-of-theart electronic video and skill games test visitors' timing, strategy and determination.

All on-site entertainment is included in the admission ticket price. All off-site entertainment and sports events are ticketed separately. All rides at the FunFair are ticketed through the universal coupon system. Books of Funfair tickets may be purchased at a discount.

Write The 1982 World's Fair, P.O. Box 1982, Knoxville, Tennessee 37901.

### THE FINISH LINE

How do you handle runners coming across a finish line at the rate of 5-15 every **second?** As many as 900 every minute? Mike Crawford, Finish Line Director provides insight into the process as well as some specific finish line instructions.

This year, instead of finishing in the Market Square Mall area of Walnut Street, runners will pass Market Street and make a left on East Church. What lies ahead is one of the fastest finishing road races anywhere—it's straight downhill for the last quarter mile and the course should be lined with hundreds of enthusiastic spectators on the nearby hills and crosswalks. The new finish area, which is in the vicinity of the Coliseum, will provide more space for chutes as well as offering a covered garage area in case of inclement weather.

As the runners turn off Gay Street onto East Church, they will pass the News-Sentinel and Journal Offices on the right. They will then approach the viaduct and be able to see the finish ahead. At this point, runners MUST MOVE TO THE RIGHT as they will encounter a median in the street near Mulvaney and they must be to the right of this median.

The finish line is located about 100 feet in front of the cross-walk at the Mulvaney Street intersection. As they cross the finish, runners will see some 8 to 10 chutes in front of them. The chute to the far right will be Chute 1 and each chute will be numbered from right to left. At this point a race router will instruct runners as to the best approach to the open chute. Runners must move quickly into the chute and MUST KEEP MOVING QUICKLY through the chutes. It is also imperative that runners stay in line in the chutes.

But how, exactly, does this chute system work?

Each chute is capable of handling 250 runners. A "Head

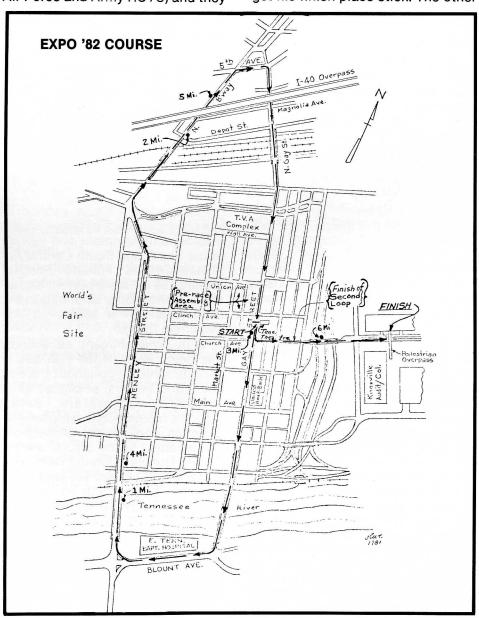

Counter" counts runners as they enter the chute. Once 200 runners have entered, the Head Counter will issue the command to: "Open Chute Two". This will simultaneously instruct the chute operator to close whichever chute is open and open the next one. The opening and closing of chutes is accomplished with highly visible ropes. Once all 8 or 10 chutes have been used, Chute 1 will then be reactivated and the progression will continue.

The opening and closing of chutes requires precision and perfect cooperation. To insure that this will be the case on race day, two practice sessions are held prior to the race. The Finish Line Director assembles the head counters and backup counters, and the chute operators (who are Cadets from the Air Force and Army ROTC) and they

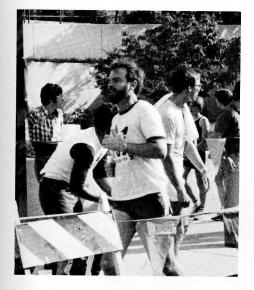

rehearse the roles they will play on race day.

Runners sometimes get annoyed at the finish line staff who may seem to be brusque in issuing their orders to "move along", "don't stop", "keep moving". What runners should remember is that finish line procedure is serious business and that everyone HAS to keep moving through the chutes or else runners will stack-up at the finish and not be able to cross the line. The Cadets are polite, but they are also firm because it is their job to be.

These same Cadets are ready in any emergency. If a runner should become sick or injured in the chute area, the closest cadet will immediately assist. The next closest Cadet will take the runners number and proceed through the chute to get his finish place stick. The other

Cadets spread their ranks to fill in any gaps created by the departed Cadets. The injured or sick runner will be moved immediately to the side for the medics to then assist.

As runners reach the ends of the chutes they will be given numbered sticks. At each chute, the sticks are numbered consecutively and are packaged in bundles of 25. At Chute 1, the sticks are numbered 1-250. At Chute 2, 251-500, at Chute 3, 501-750, and so on. If 221 runners enter Chute 1, they receive sticks numbered 1-221. Chute 1 is then closed and Chute 2 opened. The first runner into Chute 2 receives stick #251. What happens to numbers 222-250? The computer, which will compile race results has previously been programmed to change #251 to the next number in sequence, in this case #222.

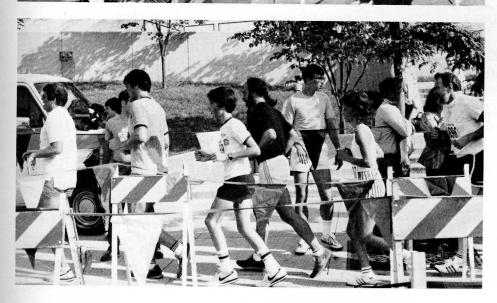

The computer also handles finish times and all race results. In the weeks prior to the race, information about every entrant is fed into the computer and held there so that on race day only the finish number and times need to be recorded.

At the finish line there will be a Super Digital Clock. This clock is visible to runners so they will immediately know their finish times. In addition, there will be 4 Knoxville Track Club Members with result sheets which are numbered in minutes and seconds. Another KTC Member serves as official timer and calls out the official time as each runner or group of runners cross the finish line. At the same time, the recorders write the runner's race numbers (on the front of their shirts) on the time sheets next to the corresponding finish time.

How do four people record times for 15 people per second? Well, they don't. They record as many as they are able but it is only a fraction of the actual number crossing especially during the busy times. The computer has available the order of finish for all runners (based on the finish place on the stick given to runners and the race number worn by the runner) and actual finish times for every fourth or fifth runner. The computer then scans the order of finish and assigns actual times. Then, it is possible to assign times to the runners in between based on the times of runners ahead of them and behind them. For example, if one runner finishes 431st in a time of 42:26 and another runner finishes 436th in a time of 42:27, runners who finished 432, 433, 434, and 435 must have times between 42:26 or 42:27. The computer will assign them the fastest time or 42:26. This system has been studied and found to be accurate within one second.

The finish line staff have worked hard to be able to provide an efficient, smooth finish procedure which will give all runners an equal chance to cross the line at their own pace and to have precisely accurate times and finish places available as quickly as possible. If runners will cooperate by FOLLOW-ING INSTRUCTIONS of finish line personnel and MOVING RAPIDLY through the chutes, the finish should be smooth and orderly.

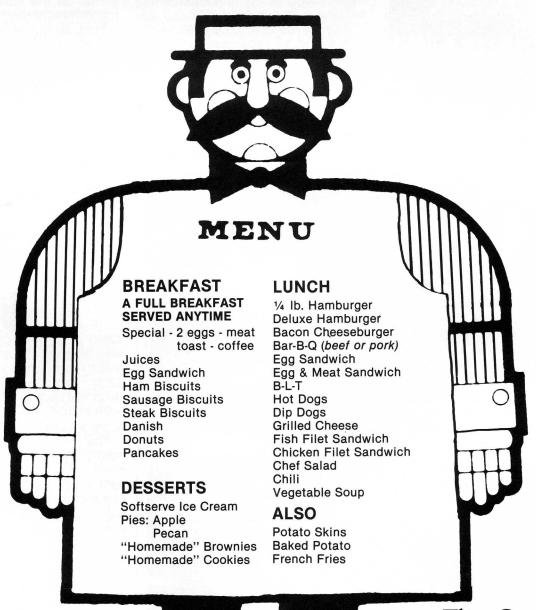

Mike Crawford Finish Line Director Knoxville Track Club

### **RUNNING: A FAMILY AFFAIR**

When the Bruce Boyer Family go for a run it looks like a cross-country meet in progress.

There are six Boyers altogether and every one of them a runner. "Dad" is Bruce; restaurant manager, farmer and former collegiate distance runner. "Mom" is Donna; housewife, mother, and middle-of-the-pack 10K runner. But it is the Boyer boys who are emerging as the stars of the family.

Craig, 9, a "redheaded fireball" as his mother says has a 10K best of 44:37 and has run a marathon in "about five hours." Craig began running competitively at the age of five and has since won numerous 10K events in his age group.

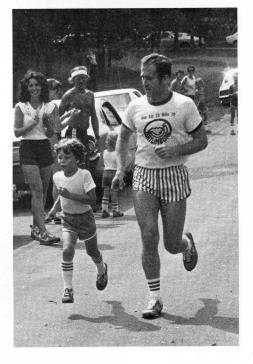

The seven year olds are twins: Eric and Bourke. Eric has a 10K best of 44:40 and Bourke a 45:10. They have been the youngest male finishers at the Expo 10,000 and, like Craig, have participated in the Junior Olympics and have qualified for national competition.

The fourth Boyer is Brandon, 4. He has been raised in running and thinks that words like "E.R.G.", "split", "fartlek", and "shinsplint" are part of every 4-year-old's vocabulary. He has been running since he was three and has already run in three races (and won an award in each). He trains daily, (two miles a day) and "running to him," says his Mom, "is as natural as getting up in the morning."

The family's training schedule revolves around the boys, who run 4-6 miles a day. On "fast" days when they work on speed, their Dad runs with them. On "slow" days,

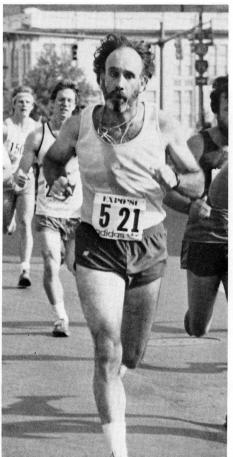

when the object is to loosen up and run easy, they run with their mother. When race day comes, the whole family is at the starting line. But they don't race as a group. Each is a competitor and each runs to the best of his (or her) ability with winning a division or improving a personal best as goals.

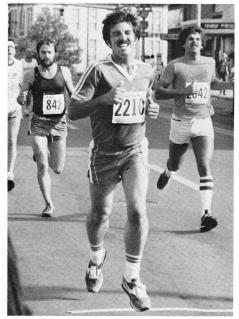

How do Mother and Dad feel about their children's running? "We are very proud. We not only en-

courage them to run but we run with them and race with them. I hope they understand that we encourage them because we care about their physical well-being. We want them to be healthy and happy and running seems to meet these needs." They also feel that running has gotten them all "unglued from the television set" and brought them closer together by giving them a common base.

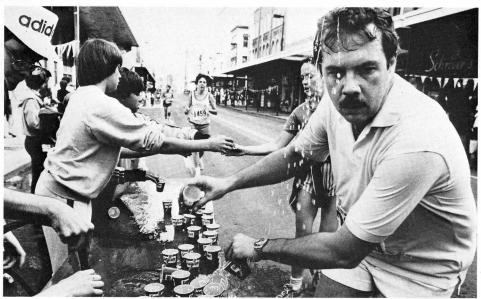

## RUNNING AND ——— WHY IT'S GOOD FOR YOU.

IC

Researchers at San Diego State University have found that runners showed less decline with age on timed intelligence tests than did non-runners. They suggest that perhaps vigorous exercise slows down the "slowing-down" process that occurs with age.

#### **WEIGHT LOSS**

"The ultimate cure for obesity is exercise," according to Covert Bailey, author of *Fit or Fat.* 

It requires a deficit of 3500 calories to lose one pound of fat. This deficit may be created by consuming fewer calories or burning more or a combination of the two. Running uses approximately 80 calories per mile (more for heavy people). This equates to one pound lost for every 44 miles run provided intake remains constant. A controlled diet of 1500 calories per day combined with an average of four miles of running per day will create a fat loss of more than a pound a week for a moderately active average sized person.

#### SMOKING.

Running reduces the urge to smoke for some people and can aid in breaking the cigarette habit. Running can also reduce the harmful effects of smoking for people who continue to smoke. Smokers generally have 8% to 11% carbon monoxide in their blood (5% is considered "safe"). However, smokers who run regularly have carbon monoxide levels comparable to that of non-smokers and significantly lower than that of sedentary smokers. (Dr. Gabe Mirkin has suggested that the average pack-a-day smoker loses 7% of his oxygen-carrying capacity to carbon monoxide and that runners who smoke could improve their performances 7% if they stopped smoking).

#### MENTAL HEALTH.

Emotionally disturbed and behaviorally disordered children who participated in a running program for twelve weeks displayed significantly less aggressive behavior than children who participated in other sports activities. Running can be used as therapy for disturbed children and in some cases can be used instead of medication to control behavior. Running has also been used as a means of therapy for mentally ill adults and it has been prescribed as a means of reducing stress for persons who are subject to anxiety or hypertension and as a method for reducing depression. Why?

Neurological research has shown that distance running produces an increase in the level of a group of hormones known as "catecholamines." Marathoners may have levels 600 percent above normal. Persons who suffer from depression, on the other hand, have very low levels of catecholamines.

Further, there is now evidence that the "runners' high" may be biochemical as well as mental. The brain produces beta-endorphins which are opiates or narcotic-like substances that are used by the body to alleviate pain, induce sleep, and provide a sense of well-being. These substances are produced in increased quantity during sustained exercise.

#### ALCOHOLISM.

Running has been used as part of a treatment program for alcoholism. Many persons have found that they substituted one addiction for another as they stopped drinking and started running. Many group therapy programs for alcoholics incorporate running as part of the group activities and members find mutual support for their running programs as well as for their abstinence from alcohol.

#### **HEART DISEASE.**

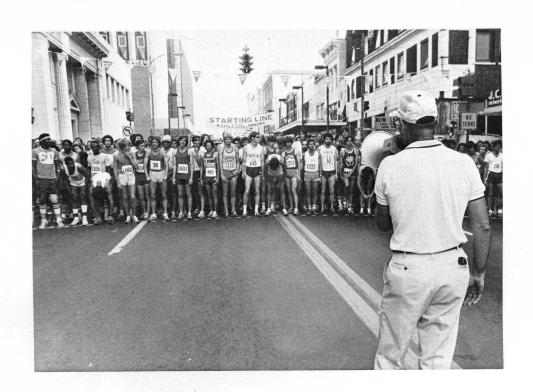

Running has been found not only to aid in the prevention of coronary heart disease but also to assist in the recovery of persons who have experienced heart attacks or who have heart disease. The value of regular exercise, especially walking and running, has now been recognized by the American Heart Association and most of the medical profession. There are many cases of marathon runners, some of them excellent, who began walking and then running as part of their treatment program following a coronary.

#### JOB PERFORMANCE.

Corporations across the nation are building tracks, pools, gyms, and courts and fielding company teams in a variety of sports. Competition among corporations in track and road racing is as fierce as any college rivalry. An increasing number of corporations are providing workday exercise programs and running groups. Why? Executives have found that employees who are physically fit have increased productivity, decreased absenteeism and higher morale. And even though many companies are spending large sums of money on employee fitness, they find it is cost-effective to do so. Premature deaths and retirements due to heart attacks cost industry 28 billion a year and absenteeism and low energy levels due to insufficient recreation cost even more. Whatever the cost of corporate running programs, the concensus is that fitness is good business.

## OFF-ROAD

### RUNNING

The dreariness of running on a street can certainly get you down. Hard, hot, black road surface, cars, dogs and houses all sometimes combine to make running more an act of discipline than fun. Discipline has its place, but for fun running I go off-road. Off-road, for me, means off-pavement, off-crowds, off-noise, and off-training. It can range from sneaking onto a golf course when I'm hard up, to the very best running I think there is; running mountain trails. The golf course is safe, but often illegal. The mountains are legal, but a bit more dangerous. Our part of the country abounds in opportunity to get off the pavement and into some quiet woods someplace. To the Eastthe Smokies. To the West—the Cumberlands. National parks and forests, state parks and TVA areas all have trails which offer varying degrees of running difficulty.

Back-country running is great, but it does offer difficulties different from normal road running. Running on trails is not for you if you're interested in knocking out 6 miles at an even 6:30 page. It's very difficult to maintain a steady pace while running a twisting, narrow trail full of rocks and roots (just aching for a shot at your ankles). Or, while having to ford a stream or climb straight uphill. This kind of running is not for training, but for aesthetics. I train on the roads or on the track. I run in the mountains.

While the mountains offer freedom from worry about getting hit by a car, bitten by a dog, or other road running hazards, they introduce dangers of snakes, badly sprained ankles, encounters with other mutually surprised mammals (some of whom get quite angry), sprained toes, stinging nettle, and falls off of steep slopes. I have experienced each of these while running trails.

Some special advice on running in the mountains: Use foot trails; stay away from all horse trails and most jeep trails. The footing is bad enough as it is. Wear high top running shoes, as they can really save your ankles. Carry what you need in a well-designed day pack. The good ones do not restrict your motion, and it can be nice to have a sweater or wind jacket to put on. Because of the increased possibility of injury, it's probably best to run with somebody. If safety isn't so important to you, running alone certainly has its charms. Running trails demands you pay close attention to where you put your feet, so forget about training, pace, and all that, and just enjoy where you are and the feelings of interaction between your body in motion and the environment. Mountain views are spectacular and you should feel free to enjoy them. The air is crisp and clean and a refreshing change. And, in the summer months, you'll want to pick a trail that has a nice swimming hole along it. That's the only civilized way to be primitive.

**Bruce Holt** 

Bruce is a therapist in the drug and alcohol abuse program at Overlook Mental Health Center in Maryville and a recreational runner.

## **OFF-ROAD**

## RACING

Mountain trail racing is becoming increasingly popular. Escarpment trail or hiking trail races take place in mountains all over the U.S. One of the best-known of these races is the Pikes Peak Marathon-28 miles to the top of Pikes Peak and back on an old burro trail. One of the most challenging of the mountain races is located 80 miles from Knoxville-the Shut In Ridge Trail run. This is a mountain trail from Bent Creek to Pisgah through the Pisgah National Forest. It is 17 miles of narrow rocky, leaf and limb strewn path which rises over 3000 feet and includes some incredibly steep climbing.

Mountain races are not conducive to fast times or p.r.—setting but they offer clean air, breathtaking views, forest sounds and smells, cool temperatures, and a number of challenges of various kinds. Off-road racing is an interesting alternative to road racing and a nice break from the hassle of crowds and cars.

#### A MATTER OF STYLE

Anyone who has ever watched a road race of any size is aware of the diversity of individual running styles currently in vogue. There are the classic overstriders, a representative number of understriders and a few mid-length striders. There are high arm-swingers, short armpumpers, and low arm swayers. You will see high knee-lifters, no knee-lifters, high back-kickers, and low back-kickers. You will see heads carried to the left, to the right, forward, backward, and various combinations of all of the above. There will be people running on their outside ankle bones, on their inside ankle bones, on their tiptoes, and perhaps on the bottoms of their feet. There will be toes

facing outward, facing inward, and a few facing forward. You will see hips swaying, shoulders rolling, eyes rolled back, fists clenched, teeth clenched, thighs slapping, knees knocking, feet shuffling, elbows jerking and the usual number of clanking, squishing, sagging, halting and lame bodies.

Yes, if running is anything it is an individual sport—a matter of personal taste and style. And there is no reason that it should not be so. Anyone who chooses to bounce from side to side as he runs with his knees knocking and his feet slapping and his arms pumping is certainly free to do so and enjoy every minute of it. If I want my feet facing outward and my shoulders hunched

up around my ears I'll have them that way. This is your sport and my sport and we'll jolly well do it however we please.

But are there those among us who have not yet found the way? Those who still search for their own identity in the mass of confusion? Is there anyone who does not yet know whether to clench his teeth or curl his toes? Whether to land on the outside of his foot or the back of his heel? Whether to kick high in the rear or forward from the knee? If there are such people (and for them alone), we offer the following points on form. This is not, repeat, NOT, an attempt to persuade anyone to deviate from a personal style of which he has become fond.

- Feet. The feet should point forward and be kept fairly close together. Most better runners land on the midfoot, firmly planted and push off with the toes.
- Stride. A shorter, quicker stride is generally more efficient than a stride which is too long. Overstriding causes loss of momentum and wastes energy.
- 3) Body. The trunk should be erect and the hips forward. One should "run tall" and run from the hips rather than "sitting" with the weight back.
- 4) Arms. The arms should swing forward rather than sideways. Hands should be cupped rather than clenched. Some coaches prefer the arms low ("thumbs in pockets") while others prefer them high on the chest.
- 5) Head. The head should be held erect and fixed with a minimum of bobbing or swaying.
- 6) Other. In general, the running motion should be smooth and relaxed with as little extraneous movement as possible. Motion should be forward rather than up and down and the body should be firm yet relaxed.

Business at the six-story corporate headquarters is conducted amid elaborate security: closed-circuit TV monitors, doors hinged from the inside that open only with assistance from within, and interior lights that automatically dim when a door does open. The system was installed several years ago, while West Germany's most implacable terrorists were loose. Though Adidas has never been attacked, the company has received threats.

One room at headquarters is devoted to a museum, a sort of shrine to the sweaty foot. A half-dozen glass cases solemnly display shoes associated with this or that track or soccer feat; one of Owens' 1936 pairs is on exhibit. Other memorabilia include the biggest shoes the company has made—for American basketball players Artis Gilmore and Bob Lanier.

Adidas produces shoes and "textiles," as it calls warm-up suits and other articles of clothing, in several German factories and 17 other countries. Shoe production alone totals about 180,000 pairs a day. At least to a first-time visitor, its processes seem old-fashioned. Making those sleek, contemporary-looking sneakers involves rather rudimentary machines and a lot of handwork, done mostly by women seated in long rows at sewing machines. Even the three stripes are sewn on by hand.

Ever since Adi Dassler switched from slippers to sports shoes, Adidas' goal has been to make the shoes lighter. The museum exhibits provide evidence of its success. In the Thirties, soccer shoes looked like combat boots and weighed almost as much, or so it must have seemed to the players wearing them. Adidas' latest model weighs a mere 240 grams. The "Marathon 80" jogging shoe weighs a feathery 170; a child's helium-filled balloon can carry one aloft.

The lightweight soccer shoe took almost two years to develop and is a typical example of how Adidas goes about improving the breed. Bearing in mind the need for foot support and durability, the company's designers interviewed numerous German soccer players. They also studied the game itself and concluded, says Dr. Ingo Rossler, the marketing manager,

"that 95 percent of the time soccer players are running, not kicking. Therefore, they don't need a heavy, strong shoe. They need one light enough for the 100-meter dash." So Adidas prepared six or seven prototypes, which were worn by German stars under game conditions. The players' reactions led to modifications, such as making the sole flexible along both the vertical and horizontal axes. "World Cup '78," as the shoe was called, appeared in time for the event of the same name, and it wound up, according to Adidas, on more Cup feet than any other shoe.

Adidas leans heavily on its stature as the shoemaker of champions. The standard recitation includes these Adidas connections: 82 of the 99 individual medals and 44 of the 48 relay medals won in the 1976 Olympics; some 75 percent of all the players in the 1978 World Cup (actually a decrease of 5 percent from four years earlier); both contestants in the 1971 championship bout between Muhammad Ali and Joe Frazier; and 14 of the 18 teams in Germany's premier soccer league, a ratio worth many marks in the country that remains Adidas' number one market.

"When a kid goes into a store and says, 'I want a pair of Adidas,' "Ingo Rossler declares, "he realizes that there's a whole aura of gold medal winners behind those shoes. Nobody's interested in losers—although they're wearing our shoes, too."

My own teen-age daughter doesn't know a gold medal from a pulled muscle, but she does know what's in with her schoolmates. When she went into a store a few months ago, she refused to accept a discontinued Adidas model that was perfect save for one detail—the brand name was not emblazoned on the heel. She explained, "People won't be sure I'm wearing Adidas."

Rossler readily acknowledges that Adidas' arrival as a fashion item is a happy accident. "It's not just with kids," he sais. "Bartenders in Los Angeles, we're told, are wearing our boxing shoes. That sounds a little crazy, but the shoes are light and comfortable. Aside from comfort, you have the prestige aspect. Passive people want to identify with active, sporty types, and Adidas stands for being spor-

tive."

Rossler's presence at Adidas illustrates its desire to import talent from other fields in order to capitalize on the rapidly expanding sporting goods market. He is a 35-year-old Doctor of Economy who worked as a marketing executive for Ford-Europe and Opel/General Motors. A crisp, no-small-talk model of German efficiency, he represents a deliberate departure from the professional shoemakers who built the company. Yet the top echelon at Adidas carries on in the old manner. The company is run by Adi Dassler's widow, Kaethe, and their four daughters, one son and two sons-in-law.

It is truly management by committee. "The family," along with a single non-Dassler, meets every workday after lunching at home in their white stucco residence, known as "the villa." Although they have relaxed their grip on company affairs, the Dasslers still make all the important decisions.

Presumably under the Dassler's direction, Adidas' relations with the crosstown competition have warmed slightly. As a Puma official puts it: "If the two companies have a common problem now, they talk about it. And if one of our executives meets one of theirs on an airplane, we say hello." Some of the conflict is resolved on local playing fields. Soccer teams from the two companies meet twice a year, drawing several thousand spectators; no shares of market ride on the outcome, but the game is always fiercely contested.

Puma seem content to be the Avis of German sports shoes and to stick solely with shoe manufacturing. "Let Adidas push all these other lines," says Puma's public relations director airily. "We do not intend to be a pharmacy for sporting goods."

That is lucky for Puma, one feels. Adidas' Dassler clan, together with its crew of marketing specialists, seemingly will not rest until every dog in the Lapland 500 is saddled with a three-striped blanket—and signed to an Adidas contract. As Rossler says, his Prussian restraint working hard to suppress buoyant optimism: "People everywhere are more health and recreation conscious now, and they have more leisure time. We see no end to it all."

```

The average male entrant in the 1981 Boston Marathon was 5'9", 148 pounds and 36.7 years old. The average female was 5'2", 115 pounds, and 31.7 years old.

Rolling Stone Mick Jagger, 37, runs (4 to 7 miles a day) to get in shape for a tour with his rock band.

The "coatman" ran the entire Orange Bowl Marathon in 70 degree heat in a heavy winter coat. He finished in 4:05 and says he "came near death." Really?

The Sponsors of Expo 10,000 would like to thank the following for their contributions toward this successful event.

# FINISHED!

Organizing and putting on a world's fair is

much like running a marathon.

The one-mile marker came with our official licensing and sanctioning by the International Bureau of Expositions in April of 1977. The 10K point, with the securing of a unique private financing package in October of 1980. Then when the People's Republic of China joined our growing list of international participants a year later, we knew we were more than half the way home.

After eight years of hard work and planning (much of it uphill), The 1982 World's Fair is at last finished and ready for you to enjoy. We hope you'll make the most of this once-in-a-lifetime event.
